

# HUNGARIAN WINE SUMMIT

NATURAL HARMONY -  
Sustainable Winemaking in Hungary

Dr. Barnabás Kovács & Gergely Makai

- Organic, Biodynamic, Natural

- Organic vineyards in Hungary ~3,2% of the total surface
- Sustainability is the main issue for everyone
- Rather small, family owned estates go further
- Dynamic demand for organic, biodynamic and natural wines

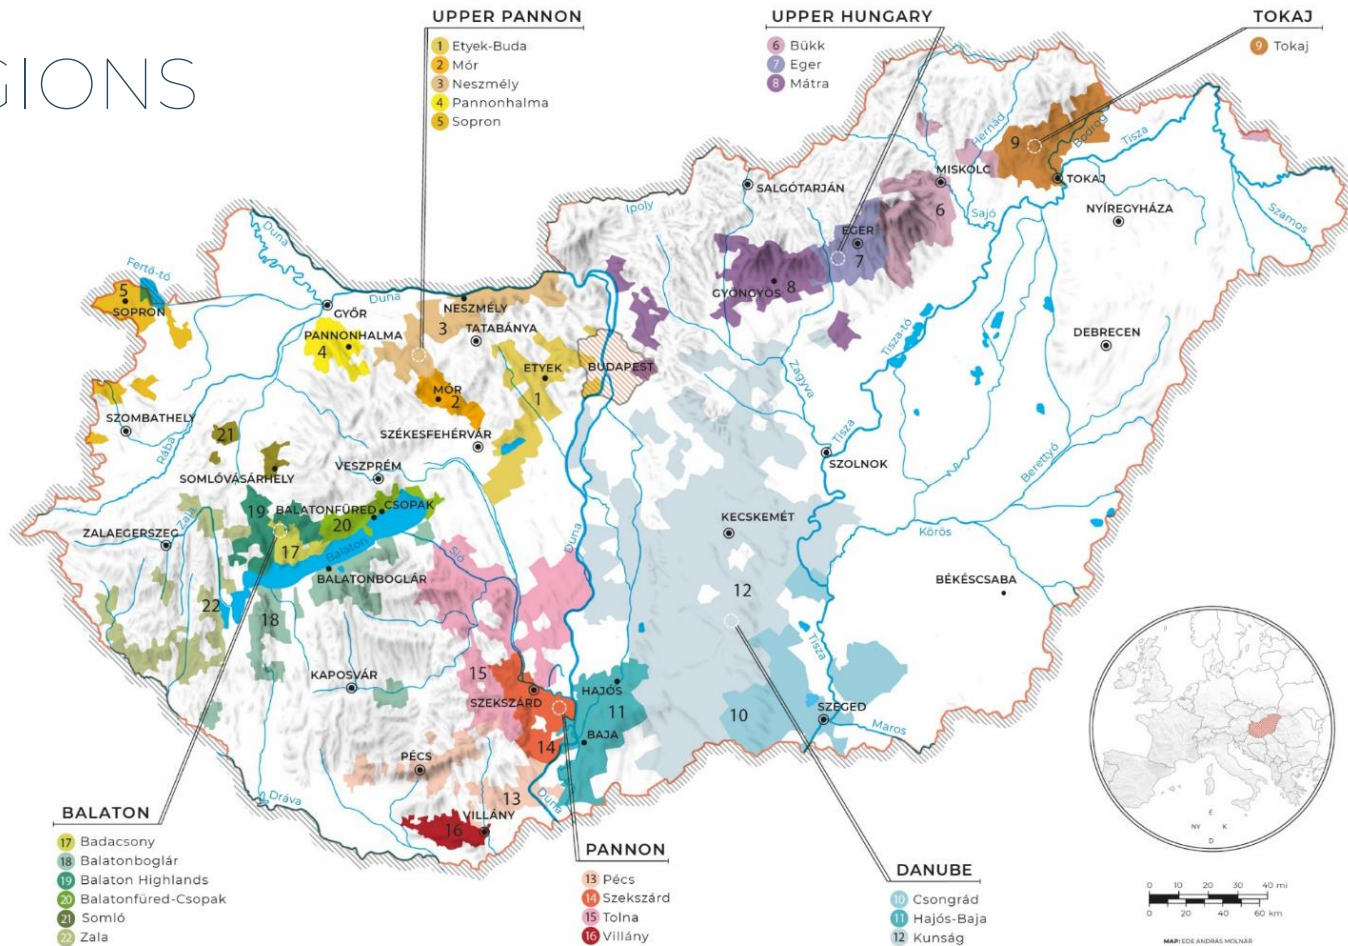

# • Wine Maker's Motivation and Goals

- Abandon of chemicals (pesticides, additives)
- Get closer to nature and our vineyards
- Taste as pure and natural as possible
- Authenticity (terroir, heritage)
- Sustainability for our children
- Lower CO<sub>2</sub> footprint

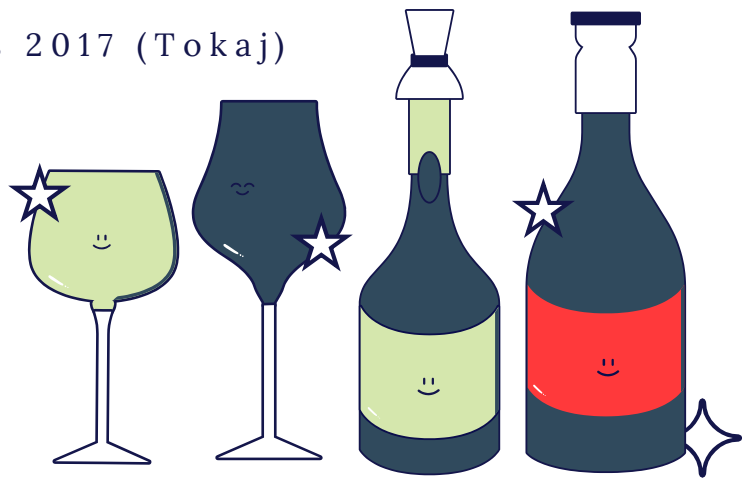

# WINE REGIONS
